It's the birthday of the Scratch program and you are tasked to create a simple animation for this grand celebration.

Using all the provided sprites, make an animation for when the green flag is clicked:

1 the balloons start to slowly glide upward and the "Happy Birthday" text glides down;

2 as the balloons and the "Happy Birthday" text move in their given direction, there will be a background tune of "Happy Birthday to You";

3 when the "Happy Birthday to You" tune is done, the lights will start blinking as the tune suddenly changes to a party sound, and then all the Scratch characters will start to dance, celebrating and partying to the beat of the music.

Don't forget to save your file as: SurnameFirstName_L39
