

Wizards are people who are said to possess magical powers and turn them into powerful spells.

Since you have learned all about the Looks Palette and how to change the looks of your sprite, I guess you are now ready to create an animation that shows the seven amusing powers of a wizard. These powers should be shown every time the wizard points his magic wand to the witch, making the witch's appearance change.

Magical Hint:

To make the wizard seems like he is casting a spell on the witch, assign a key to each powerful spell and make the wizard turn 5° to the right with a fairy dust sound then return him back to his original position by making him turn 5° to the left.

Go ahead and start creating your magical animation.
